Environmental Policy

It is the policy of R G Stones (Buildings) Ltd to prevent pollution to the environment as a result of its activities in manufacturing relocatable buildings and to maintain a sustainable environment for the future.

The organisation is committed to complying with applicable environmental legislation which relates to its environmental aspects.

This aim to minimise our adverse environmental impact is pursued through:

- Minimising waste by using material resources efficiently.
- Manufacturing buildings which can be relocated as required to maximise the sustainable re-use of resources and minimise the generation of waste.
- Manufacturing our buildings using environmentally friendly timber components procured from companies affiliated with sustainable forestry schemes such as The Forest Stewardship Council.
- Segregating waste types for recycling and actively promoting recycling to the workforce.

The implementation of this policy has resulted in the establishment of an Environmental Management System and associated procedures which have been approved by the undersigned. The policy, procedures and objectives will be reviewed periodically with the aim of continually improving the effectiveness of the Environmental Management System.

The management of R G Stones is fully committed to these objectives. Each person within the company is responsible for playing their part to meet these objectives.
